METRO
PERFORMANCE GLASS

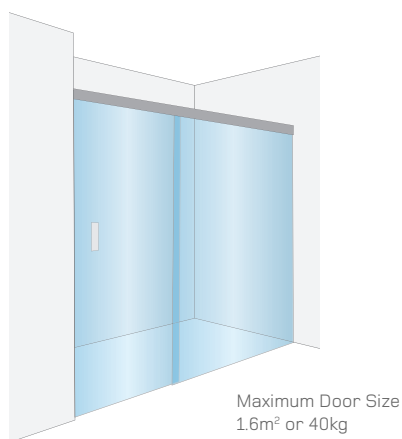

Modern bathrooms are an oasis for well-being, a place of relaxation and recovery. And a statement of style that reflects the personal taste and sophistication of the homeowner.

Metro's Soft Close sliding glass shower blends the functionality of our innovative sliding technology for minimalist clean lines to enhance any bathroom design.

To meet the multi-configuration requirements of modern bathrooms, our Soft Close sliding shower has been specifically designed to allow you to design for wall-to-wall, wall-to-glass and glass-to-glass applications.

And the concealed slide technology, clean profiles and finish options ensure that they are easy to clean and maintain, whilst providing a level of elegance and modernity that will compliment any bathroom concept.

There is a maximum door weight of 40kg, so there are some limitations however; this easily covers the standard door width of around 600mm in most applications.

For ease of installation and ventilation*, a space of 100-200mm from ceiling to soft close unit is recommended.

*In conjunction with an extractor fan
