

Glass Bath Screens

A fashionable, premium look in today's high spec homes. Our Bath screens are custom made to suit your bathroom layout. Whether it requires hinged or sliding, angled panels or notch cut-outs, we deliver the best solution. Bath screens hardware can be matched to your other bathroom fittings and/or decor.

NOTE: For showers and bath screens that do not have a door there is a need to have the whole bathroom floor as a wet area. This is a requirement if the edge of the screen is less than 1500mm from the shower rose. (Ref New Zealand Building Code E3). Grading to a floor waste and terminate with a water stop.

NOTE: All floor waterproofing to terminate at a waterstop.

(b) Shower panel less than 900 mm

DIMENSIONS IN MILLIMETRES

Key Features

- ▶ Choice of folding, swing or fixed panel bath screens.
- ▶ Channel Designs.
- ▶ End Caps.
- ▶ Channels are available in bright and natural silver anodised, matt black powdercoat as standard finishes.
- ▶ Special colours Powder coated on request.
- ▶ Custom made to fit the bathroom space.

Optional Extras

- ▶ You can add glass shelves, or protect your bath screen with an EZClean Coating - designed to enable glass to have less contact with dirt, making your shower easy to clean and reducing limescale and grime.
- ▶ Options for a hinged panel door. The hinged bath screen provides a combination of splash guard and door. Hinged off a glass panel, it folds back on itself enabling easy access to taps.

EzyClean Technology

- ▶ Applied in our state-of-the-art manufacturing facilities, Metro's unique EzyClean Technology provides a protective coating that creates a long lasting, invisible shield on your home's glass surfaces.

- ▶ Water will simply bead off the glass surface, resulting in cleaning time being significantly reduced. And it also makes cleaning simple, only requiring the use of water and a mild detergent with a microfibre cloth.
- ▶ Compared to ordinary glass, Metro EzyClean Technology:
 - resists staining from hard water deposits.
 - does not support the growth of bacteria.
 - eliminates the need for harsh and abrasive cleaning products.
 - protects against the build-up of soap scum, body oils, dirt, and grime.

Scope of Use

- ▶ Glass bath screens are an alternative to a shower curtain for this situation. A glass screen is not only more attractive looking and durable, but most importantly they offer protection from water damage by containing water inside the bath. They are also easily cleaned, making them far more hygienic than a scruffy shower curtain.

Support Inquiries
